REVIEWER'S CLINICAL OPINION

Dx

Blood glucose is significantly elevated, consistent with poorly controlled diabetes mellitus. Borderline cholesterol warrants lifestyle modification and close monitoring.

PRESCRIPTION / TREATMENT NOTES

Rx

1. Take Paracetamol 500mg twice daily after meals for 3 days.
2. Take Ibuprofen 400mg once daily after meals for 3 days if pain persists.
3. Increase water intake and return in one week for review.
